

**CLASS 4:  
ACID RAIN AND ALLOWANCE TRADING**

**SHORT OUTLINE**

**I. Intro - Collect homework. Write our names on board.**

- A. Explain briefly what will do during the class

**II. Play Video**

- A. Afterward, have a discussion about the video and its concepts, especially cap and trade.
- B. Make sure students grasp the basics of cap and trade.

**III. Play the Board Game**

- A. After the game, have a discussion with the students about the game, and how it works. Go over why someone won and why some others did poorly. Relate their behavior to how companies behave in the real world.
- B. Discuss how cap and trade is being applied to other areas of pollution control, most notably with global warming and the Kyoto Protocol.

**IV. Hand out Homework**
